

MEIVICI AE

A new standard in performance custom carbon technology.

MeiVici AE offers supreme aerodynamics coupled with the unsurpassed ride quality and handling dynamics of the company's custom MeiVici SE road model. The MeiVici AE was engineered with aerodynamic wind cheating features and customization options that produce the ultimate combination of speed and performance against the clock.

GEOMETRY

Available in road or triathlon configurations, the AE is Serotta's most revolutionary technology, most innovative design, and is the result of Serotta's greatest investment in R&D to date. Quick response, instant acceleration, speed maintenance at the lowest possible physiological cost, and carbon fiber's natural vibration dampening to keep athletes fresh over the long haul: these are the characteristics inherent in Serotta's new MeiVici AE.

INTEGRATED FORK

The MeiVici AE features Serotta's first integrated fork system. The F4's tapered oversized steerer tube utilizes a 11/8" upper / 11/2" lower bearing system. According to Serotta Composites chief Mike Lopez, "the new design not only enhances the tunability and stability of the overall steering performance, but it has also enabled the construction of Serotta's lightest, strongest most aero fork ever."

AERODYNAMICS

Each MeiVici AE's rear wheel cut out is seat tube angle specific which ensures that it will not be a cosmetic "faux aerodynamic" feature. The new aero seatpost is also a serious aerodynamic design element. Unlike

other systems there is no cutting involved and there is no need to add extra frame material to reinforce the clamping forces around a conventional seatpost clamp.

SPECIFICATIONS:

Tubing Platform: 100% carbon fiber engineered and constructed by Serotta Composites™

Finish: Custom. 7 paint schemes; 26 colors

Geometry: Custom Fit. Available in TT, Tri or Road Geometry

Average Bicycle Weight: 6.5-7.5 kg

MSRP: \$12,000 to 22,000 (complete bike)

Limited Edition

The first 20 units will be produced as a signed and numbered, Limited Edition series complete with the best of the best-new Super Record, Lightweight wheels, etc., one year of CTS training and a weekend for two in Saratoga Springs or at one of the CTS training centers. Price for this unique package is MSRP \$22,000.
